EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with David A. Tucker on March 24, 2005.

2. The application has been amended as follows:

In the claim:

Claim 24 (renumbered as claim 1), line 21, delete "and".

Reasons For Allowance

3. The following is an examiner's statement of reasons for allowance: the present claimed invention is directed to a LCD device having a display panel, a column line driver and a row line driver. Independent claim 24 (renumbered as claim 1) identifies the uniquely distinct feature, "the display control section selectively outputs a control signal for a first display mode or a control signal for a second display mode, ... is not performed", see lines 19-29. The closest prior arts, as discussed in the Office Action dated 6/25/2003, Verhulst (USPN: 5,627,560) and Verhulst (WO 97/31362), both disclosing a related LCD device comprising a display control section for outputting a control signal to the column and row drivers so that the data signal is supplied to nth row line while the black display signal is supplied to at least one of row lines other than the nth row line, either singularly or in combination, fail to anticipate or render the above underlined limitations obvious.
